

Lesson 2: Download Element

Basic Strategy Reconstruction Chart

Print out this form below and run off a bunch of copies. You will notice that it is just a "blank" of the Basic Strategy Decision Chart we used in Lesson 1 to create the rules for each of the player's starting hands. The object here is to write in the rule for each hand and then check for accuracy. Time yourself as you do it and see if you can get under 60 seconds with 100% accuracy.
